

Outline of charges for Technology Services Agreement

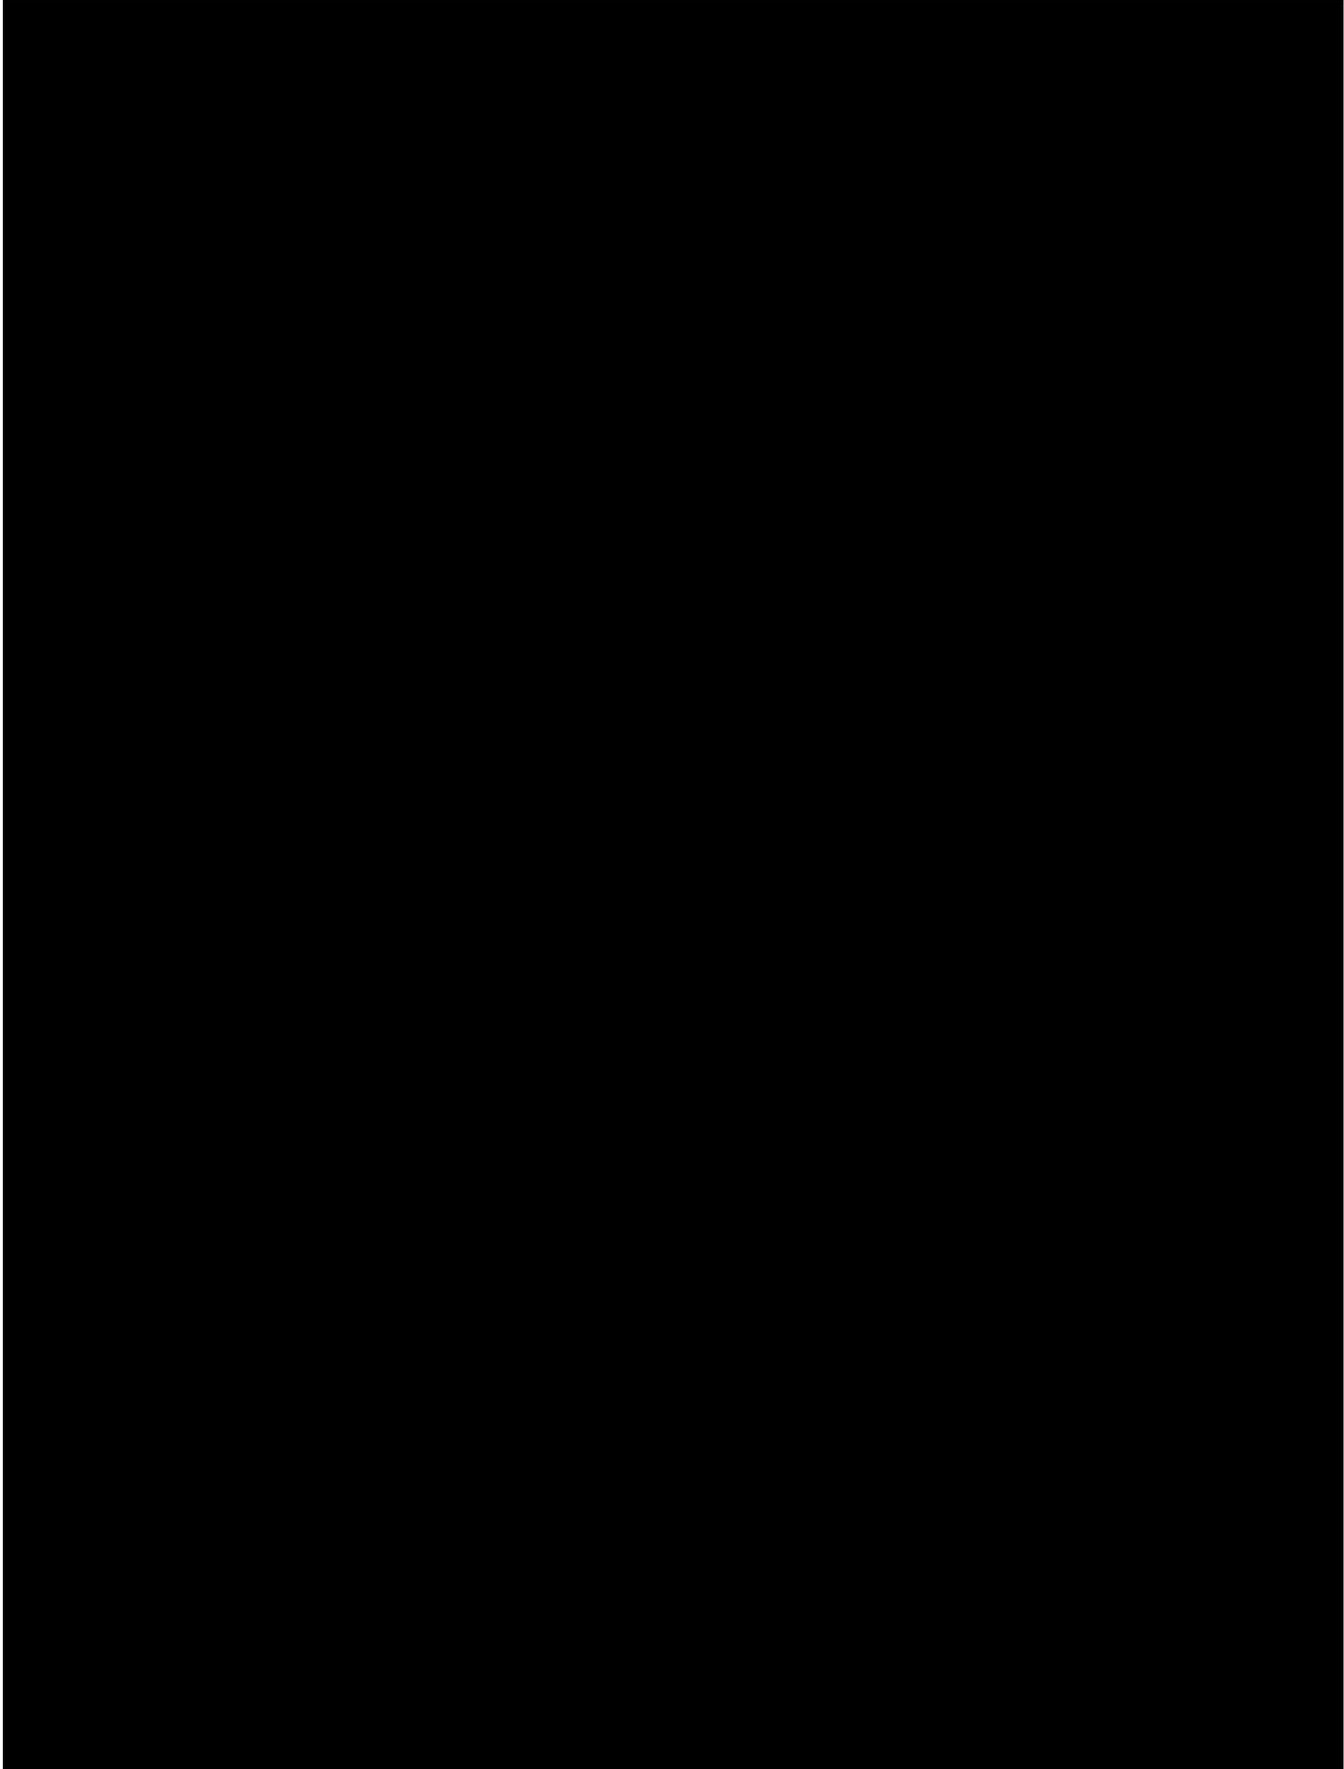

Background

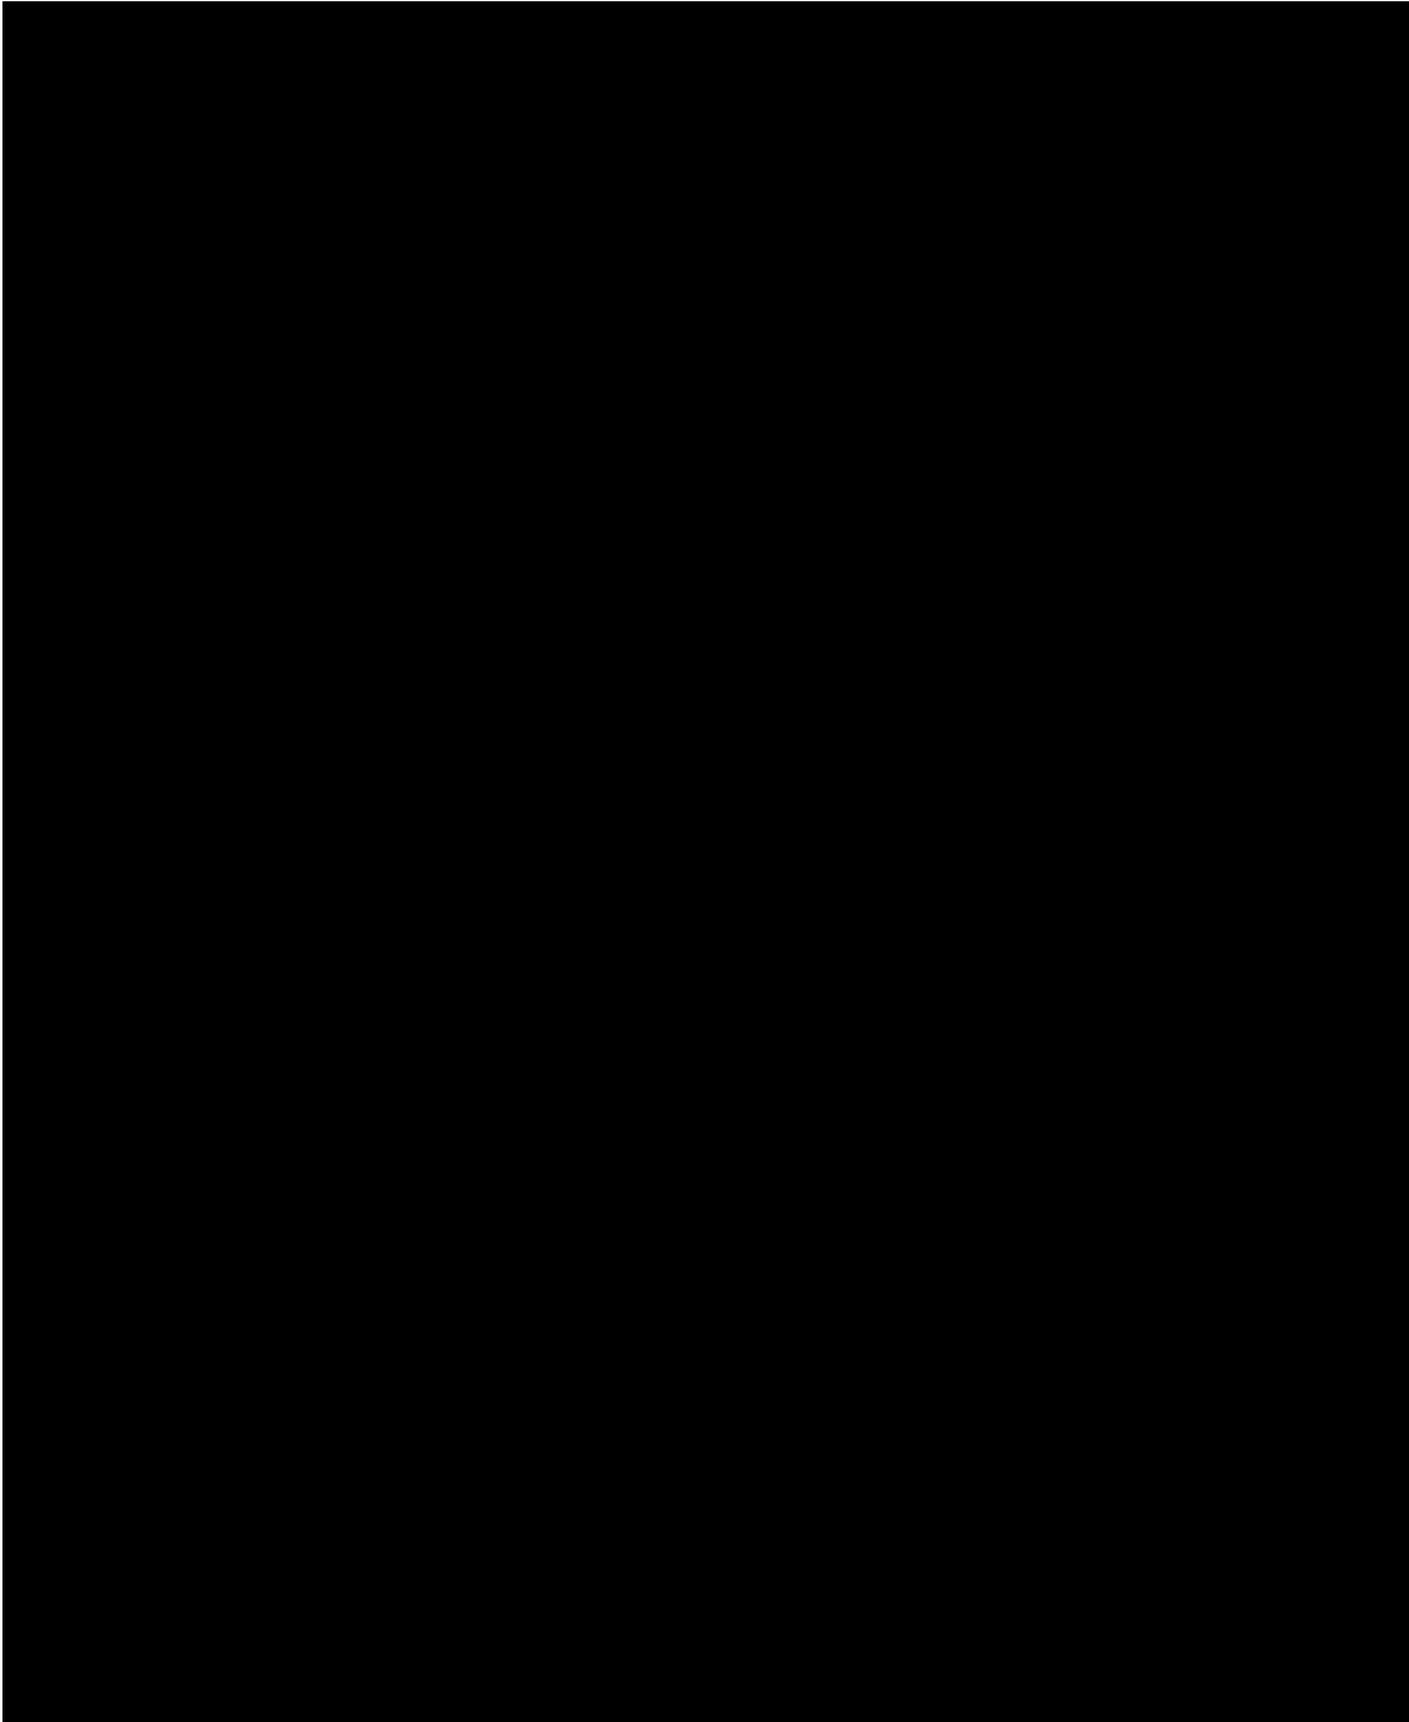

BBC Cymru Wales and S4C intend to enter into a technology services agreement (“TSA”) under which BBC Cymru Wales shall supply to S4C certain technology services at the proposed new Wales Broadcasting House in Cardiff (WBH).

The services to be provided by BBC Cymru Wales to S4C (“Services”) are outlined in the Technology Services Outline document prepared in collaboration with S4C (“TSO”). This document outlines the principles which will govern how the parties intend the Services to be paid for.

As stated in the TSO, the intention is that BBC Cymru Wales and S4C will work collaboratively to ensure that the new proposed arrangements deliver high standards of services for both S4C and BBC Cymru Wales and deliver savings which both sides can invest as appropriate for the benefit of their audiences.
